# Clocking In/Out

Clocking in/out through UKG will be discontinued on **December 30, 2024.**

- If you are working a shift that **starts** on December 29, please clock out on UKG.
- If you are working a shift that **starts** on December 30, please clock in on ESO.

When accessing the ESO time clock system, you must allow "location services" on the device being used & be within 150 feet of a station.

If needed, the assigned equipment (i.e., unit phone or tablet) is provided

https://scheduling.esosuite.net/EPS/main/TimeClock.ashx?DB=falck-sandiego

Troubleshooting

- **Turn on location services**
- **iPhone**:
Go to settings -> privacy -> location services -> safari app (whatever browser you use) -> make sure it says "while using the app."
- **Android**:
Go to Google Chrome browser -> settings -> site settings -> all sites -> go to ESO Timeclock (link above) -> make sure location is allowed
- **Clear Browser History**

Any questions or concerns, please contact the timekeeper, Jennifer Oliver, at SDtimekeeping@falck.com
